Subtests Evaluation

Each subtest will consist of a total of 100 points.
Most items are worth 1 point, while some are worth 2 points, depending on their content and level of difficulty. The point value of each item will always be clearly indicated in the test sheet.

Students pass the exam if the average of all three subtests exceeds the pass rate of 65 percent and if they reach at least 50 percent of the total score in each subtest. Both conditions must be met in order to pass the exam:

1. The arithmetic average of all three subtests must be **65 or higher**, and
2. **None** of the subtests may have a score **below 50**.

For example:

- If your scores are **70, 80, and 90**, the average is **80** — you pass.
- If your scores are **60, 70, and 80**, the average is **70** — you pass (as it is above 65 and none of the subtests is below 50).
- If your scores are **40, 80, and 90**, the average is **70**, but you still **fail**, because one of the subtests is below 50.
